PROFESSIONAL EXPERIENCE

Frontend Developer | Indiminds Technologies

Mar 2025 – Present • Kolkata, India

- Architected and developed modern, responsive web applications using Next.js, React.js, Tailwind CSS, and Shadcn UI; achieved 30% improvement in page-load performance via Turbopack and lazy loading.
- Converted Figma and Framer wireframes into pixel-perfect, cross-browser-compatible UIs with 100% design fidelity across Chrome, Firefox, Safari, and Edge.
- Integrated RESTful APIs for dynamic data handling, authentication flows, and role-based access control, enabling secure and seamless user experiences.
- Boosted SEO scores and Core Web Vitals through structured data schemas, lazy loading, and image optimization strategies.
- Engineered File Manager dashboards with data visualization panels, file download modules, and role-based access views.
- Delivered POC features for new product initiatives; contributed to Git/GitHub workflows with regular code reviews and sprint planning.

Associate UI Developer | Blu Cocoon Digital Pvt. Ltd.

Apr 2023 – Feb 2025 • Kolkata, India

- Translated Figma wireframes into functional, responsive Angular web pages with cross-browser compatibility across all major browsers.
- Implemented NgRx/Redux state management patterns to build scalable, maintainable UI architectures for complex multi-module applications.
- Collaborated with backend engineers to integrate RESTful APIs and deliver data-driven UI components within Agile sprint cycles.
- Contributed to peer code reviews, sprint retrospectives, and process improvements — resulting in a 20% reduction in UI bug backlog.
- Applied Angular Material and PrimeNG component libraries for consistent, accessible UI across enterprise projects.

Frontend Developer | UBK Infotech Pvt. Ltd.

Jan 2022 – Mar 2023 • Kolkata, India

- Built responsive, mobile-first UIs using React.js, HTML5, CSS3, and JavaScript (ES6+) for client-facing web products.
- Integrated RESTful APIs to support real-time data updates, user interactions, and authentication workflows.
- Improved application load speed via lazy loading, code splitting, and asset minification techniques.
- Maintained codebase quality with Git version control, branching strategies, and collaborative pull request workflows.

KEY PROJECTS

FitOfficeX CRM — Frontend Migration | Next.js, React.js, TypeScript, REST APIs

Led end-to-end migration of a financial stock market CRM from legacy codebase to modern Next.js architecture. Architected 4 core modules: Master, CRM (KYC/lead tracking), HR, and Exchange Segment. Built comprehensive report generation for P&L statements,

trade summaries, and segment dashboards. Integrated live market data feeds, real-time portfolio sync, and role-based access control; optimized heavy dashboards via memoization and Turbopack.
